

Study: Timber door with sensor door handle and GENIUS

Sensor door handle

- Innovative technology for opening the entrance door from the inside
- Suitable for locking and unlocking using GENIUS or opening via A-opener
- Particularly fast opening time of less than 1 second thanks to the intelligent proximity sensors
- No need for lever handle or cylinder lock
- High-quality design
- Intuitive and easy operation
- Variety of additional functions, e.g. activation of daytime release and child-proof lock directly using the sensor door handle
- Additional features can be controlled via the SIEGENIA Comfort app

Production benefits

- Quick and easy assembly
- Error-free, optimised installation: Plug & Play connection to GENIUS or A-opener thanks to plug with reverse polarity protection
- Space-saving warehousing
